Callig1 Font Picture Backgrounds

24 January 2006 Version 1.0

The supplied font images have been optimized to create a 25mm alphabet.

When importing the individual images into the *Load Design Wizard*, use the *Select All* option on the *Crop Picture* page. This will give you extra white space around the character.

In the following *Picture Size* window the height of 25mm should be entered except when creating letters that extend below the base line when you will need to compensate for the increased size; see chart below.

Set the ZigZag width to 4 mm and the Calligraphy Angle at 35 degrees.

To add the stitches, move through the design with the Free Motion l, following the Red guidelines (this will minimize jump stitches in the final design). Then overstitch with the Calligraphy ZigZag following the blue lines.

When starting and ending a character we recommend that some overlapping stitches are placed to help “fix” or tie off the thread.

A	B	C	D	E	F	G	H	I	J
25mm	25mm	25mm	25mm	25mm	25mm	25mm	25mm	25mm	25mm
